NPP20N2R: with folding platform

NPP20N2E: with lifting forks

Lower Cost of Ownership

- Sturdy chassis construction and endurance-tested forks provide enhanced robustness and durability in even the toughest conditions
- Sealed chassis and waterproof electrics resist moisture, dirt and corrosion - increasing uptime, cutting maintenance costs and prolonging truck life
- Easy access to critical truck components allows faster fault diagnosis and speedier maintenance, reducing downtime still further
- Integrated drive and lift system features fewer components than previous models, reducing scope for breakdown
- Closed battery compartment with steel cover protects battery against impacts, postponing costly battery replacement
- Standard battery sizes allow interchangeability with other brands

Unmatched Productivity

- Ergonomic tiller arm helps keep operators fresh with comfortable controls
- Increased maximum lift height suits even steep ramps and loading docks, making this an ideal truck for both horizontal pallet movements and vehicle loading/unloading
- Advanced AC programmable controller lets users prioritise between faster performance and smoother handling, ensuring the most appropriate settings for the job
- Rounded fork tips make for accurate and effortless pallet entry, speeding up handling cycles and preventing pallet or load damage
- The NPP20N2R, with a maximum speed of 6 km/h, is equipped with a foldable platform for occasional use when driving over longer distances

Safety and Ergonomics

- Latest tiller arm design permits comfortable operating position with optimum hand protection
- Super-quiet oil-filled transmission helps keep noise levels low
- Optional large lift and lower levers allow easy, one-handed control, even with gloves
- Linked suspension castor wheels ensure highest possible truck stability
- The spacious platform of the NPP20N2R, with suspension for a comfortable ride, is easy to get on- and off offering also a good ground clearance.
- The NPP20N2E is equipped with lifting forks (735 mm height) that offer an ergonomic position for loading and unloading items with minimal physical strain
